

# Thumbs-up

Being struck or trapped by heavy machinery is the second biggest killer in the construction industry.

We want you to change the way we communicate and give the 'thumbs-up' to safer working.

It's a common sign that we can all use and understand, putting behaviour before technology.

## The rules are simple

- Understand the different working zones from a safe distance
- Always approach with care and get the plant operator's attention
- Only give your thumbs-up to ask if it's safe or tell someone it's safe
- Always wait for the thumbs-up before you move

**Zero** incidents  
**Zero** harm  
**Zero** compromise  
Keeping you healthy and safe, every day at work
